OVERVIEW

This study collects default and foreclosure data from institutions regulated by the Illinois Department of Financial and Professional Regulation (IDFPR), Division of Banking, (DOB), for calendar year 2007. Part I of this study collectively identifies and analyzes all of the data submitted to this Office. Part II identifies the number of institutions and the number of reported foreclosures whose rates were 10% to 12% or greater at the time of loan origination; also, the number of institutions and reported loan foreclosures within eighteen months of loan origination. Part III includes a comparative analysis of the foreclosure rate for the Standard Metropolitan Service Area (SMSA) which includes Cook, DuPage, Lake, Mc Henry, Will, and Kane counties versus the State of Illinois foreclosure rate for those entities regulated by DOB. The time frame covers 2007-2006. Part IV includes a comparative analysis of dollar amount of loans in portfolio versus dollar amount of foreclosures filed and foreclosure completions for 2007 and 2006. Part V includes an overall analysis of foreclosure reports for 2007 and 2006. Part VI will identify all foreclosure filings in all Cook County zip-codes for 2007.

The following data was requested from each reporting entity.

- the number of loans serviced by the reporting entity
- the dollar amount of loans serviced by the reporting entity
- the number of loans in default
- the dollar amount of loans in default
- the number of loans foreclosed
- identify any of the loans that foreclosed within 18 months of loan origination
- identify any of the loans foreclosed on had a first lien interest rate of more than 10% or a second lien interest rate of more than 12 %
- addresses of all defaults
- addresses of all foreclosure filings and completions
- dates of all foreclosure filings
- dates of all foreclosure completions
- loan amount of all foreclosures
- zip-code, city and county of all foreclosures

While all of the data will be used in analysis, this summary will focus on the foreclosure information, the relationship to the servicing portfolios of Illinois institution's home loans.

Detailed charts identifying total portfolio amount of loans, number of loans, and size of loans versus the foreclosure rates are identified on pages (13 thru 24) for 2007, and on pages (27 thru 38) for 2006. Entities regulated by DOB reported 29,763 foreclosure filings for 2007. These foreclosure filings can be viewed in (Exhibits E and F) pages 45 and 46.

The total number of foreclosures filed for the first-half of 2007 was as follows: State Chartered Thrifts 32; State Chartered Banks 426; and State Licensed Mortgagees 12,364. **The total number of foreclosures closed were as follows:** State Chartered Thrifts 24; State Chartered Banks, 174, and State Licensed Mortgagees, 4,343; **the total amount of foreclosures filed for the second-half of 2007 were as follows:** State Chartered Thrifts 55; State Chartered Banks 500; and State Licensed Mortgagees 16,386. The total **number of foreclosures closed** was as follows; State Chartered Thrifts, 26; State Chartered Banks 270; and State Licensed Mortgagees 5,562.

The total amount of foreclosures reported in the second-half of 2007 with interest rates of 10% to 12% or greater was 865 can be seen of page 39 (Exhibit A). The total amount of foreclosures reported for the second-half of 2007, and foreclosed within eighteen months of loan origination was 1,203 and can be seen on page 40, (Exhibit B).

On pages 41 and 42 (Exhibits C and D) you will find Illinois census information as well as information gathered from the most populous Illinois counties relative to foreclosure filings in these areas. This data was used to extrapolate figures to estimate state wide foreclosure filings for 2007.

GENERAL INSTRUCTIONS

- **MAKE CERTAIN YOU HAVE FILLED IN THE (COMPLETE) INSTITUTION NAME AND ADDRESS AT THE TOP OF THE REPORT.**
- Consolidated financial accounting basis means that you are to include information from all operating subsidiaries, service corporations, etc., using generally accepted accounting principles (GAAP).
- Average quarterly reports – The contemplated calculations for lines 1(A), 1(B), 2(A) and 2(B) calls for loan information, normally shown on quarterly call reports for banks and thrifts or other quarterly reports for licensees, to be averaged. For example, if the dollar amount of 1-4 family conventional loans on your entity’s books were \$100,000 on March 31 and \$120,000 on June 30, then the entry on line 1(A) would be \$110,000. What is desired is a number that reflects an average throughout the reporting period rather than activity on a specific date such as June 30. If, in lieu of quarterly reports, some other average method is used (monthly, weekly, etc.), please explain in a separate attachment. Please report dollar amount of loans to the actual dollar amount, **DO NOT TRUNCATE.**

INSTRUCTIONS SPECIFIC TO LINE 1(A)

- Include loans that are first and subordinate liens.
- If it would be difficult to separate the dollar amount of loans on Illinois properties from non-Illinois properties, it is permissible to estimate the dollar amount of loans that are Illinois properties and place this number on line 1(A). If an estimate of Illinois properties is provided, please explain in a separate attachment.

INSTRUCTIONS SPECIFIC TO LINE 1(B)

- If you are unable to provide the actual number of Illinois loans to answer this question, you may estimate the number Illinois loans. If an estimate of the actual number of Illinois loans is provided, please explain in a separate attachment.
